RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 62 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 edition. Excerpt: . . . a laminated floor. Each of these floors is covered with two or more thicknesses of waterproof paper or similar material and then by a top, or wearing floor laid at right angles to the direction of the Where plank floors are laid flat, the boards should be two bays in length if possible and laid to break joints every 4 feet. With laminated floors, it may be difficult to obtain plank two bays in length. A strong and stiff floor will result if the planks underfloor. Material is surfaced on all sides and edges of plank beveled to serve as a finish on the ceiling below. are laid with the ends extending between centers of girders with one plank laid across the girder at frequent intervals (every sixth or eighth piece) to act as a tie in the floor. Or, by another method, the ends of planks should join at or near the quarter point of the span between girders, taking care to break joints in such a way that no continuous line across the floor will occur. Fig. 4 shows an instance of this kind in which the span between girders is 16 feet and the planks are 16 feet long. The method of lamination shown in Fig. 4 is as follows: Every fourth piece of plank extends from center of girder to center of next girder. Next to this piece of plank, a second piece of the same length is nailed with...
