Though substantially a revised edition of the Elementary Astronomy so extensive and important have been the additions and improvements, as to justify the adoption of a new title, and to warrant the hope that it will not only be found eminently suited to its purpose, but that it may now go on for years without further revision or alteration. For juvenile learners, the Primary Astronomy may be preferred; and for advanced classes, who wish to study the constellations in connection with Mythology, the Geography of the Heavens should be chosen in preference to all others; but for all ordinary students, this intermediate work will be found sufficiently elementary on the one hand, and sufficiently extended on the other. The work is now divided in three parts. After an Introduction, which consists of Preliminary Observations and Definitions, and occupies twenty pages, Part First is devoted to the Solar System - the sun, planets, comets, eclipses, tides,c.; Part Second relates to the Sidereal Heavens - the fixed stars, constellations, clusters, and nebulae; and Part Third to Practical Astronomy - the structure and use of instruments, refraction, parallax, c. This department, so seldom introduced into text-books for schools, will be found especially interesting and valuable. Besides embracing all the late discoveries in astronomy, under a strictly philosophical classification, the work is now thoroughly illustrated, by the introduction of diagrams into the pages, in connect ion with...
